AGENDA

- Existing Docgen Limitations

- New Docgen Functionality

- Overview of Tags

Existing Docgen Limitations

- Dependency on Word 2007

- Meta-data is specified within the Word Document template

- PDF conversion has a dependency on the runtime environment, Hence dependent on windows OS.

- Performance Constraints

- Steps to configure New Docgen service

Policy : https://confluence.majesco.com/display/DOC/Policy+Runtime+Configurations+For+Docgen+Service

Devstudio : https://confluence.majesco.com/display/DOC/Environment+Setup+-+Pre-Requisites

MAJESCO

New Docgen Functionality

DESIGN TIME – Document Template designing.

- Word Template Creation
- Tags Identification
- Defining Template via Dev-Studio Interface
- Defining Meta - Data

INSTALL TIME – Document Template Data Publishing on the Target.

- Build Execution to create an installable Pack
- Install the pack on the target(via Dev – studio or separate installer Executable)

RUN TIME – Integration with Docgen Services.

- Setup Docgen Configuration Parameters
- Enable Docgen Services
- Enable Aspose PDF Converter
